

CELLETTA TERMOSTATICA

Nuovo - New

CT600

CT 600 This plant is very useful for adhesive preservation and regeneration during the cold season. As everybody knows, with the cold winter temperatures the adhesives suffer important viscosity (liquidity) alteration, with consequent dangers relative to their application and efficiency. Since the optimal viscosity is reached at + 20°C, it would be good custom take the adhesive to the above mentioned temperature before its application on the shoe.

CT600

DATITECNICI - TECHNICAL FEATURES

DATI TECNICI	CT 600
Potenza	1 Kw
Voltaggio	220V 50Hz
Dimensioni	100x66x108H
Peso netto	150 Kg
Origine	Made in Italy

La IROCOL srl si riserva di modificare i propri modelli per migliorare la qualità, la funzionalità e l'estetica a proprio insindacabile giudizio.
